Life Wireless™ Fact Sheet

Talk Text Live

Revised Aug 2015

Life Wireless™ provides mobile phone service to eligible low-income families and individuals. Life Wireless is supported by the federal Lifeline program, which was created in 1985 to ensure that all Americans have access to quality telephone service. Potential subscribers must meet certain income-based eligibility requirements. Life Wireless service is limited to one per family or individual and cannot be combined with any other Lifeline offering. Life Wireless, based in Covington, Ga., is part of the Telrite Corporation.

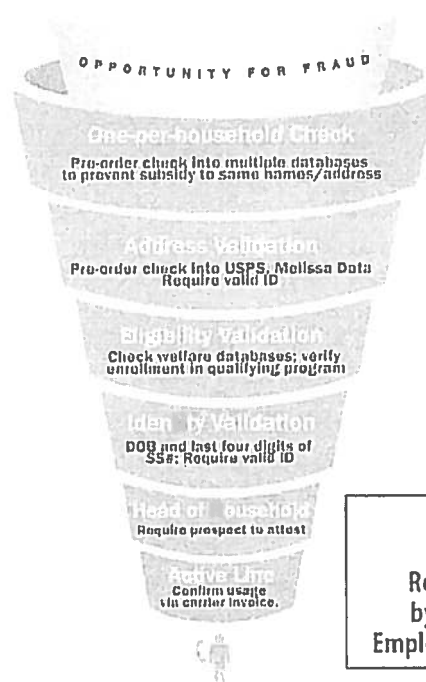

Qualities?

The exact requirements vary by state, but a subscriber generally is eligible to receive phone service from Life Wireless if they have a household income up to 135 percent of the federal poverty level or participate in one of the following government assistance programs:

- Temporary Assistance to Needy Families
- Supplemental Security Income
- Food Stamps
- Medicaid
- Federal Public Housing Assistance
- Low-Income Home Energy Assistance Program
- National School Lunch Program's Free Lunch Program

Safeguarding the System

Life Wireless is committed to preserving the integrity of the Lifeline program and helping those most in need obtain phone service. What They Receive

Lifeline-eligible customers receive a free mobile handset that includes voicemail, text messaging, call waiting and caller ID. The plans and pricing vary by state.

Lifeline Program

Life Wireless is supported by the Lifeline program, which was established in 1985 to help low-income people afford telephone service. The program is administered by the Universal Service Administrative Company (USAC) and is overseen by the Federal Communications Commission (FCC). No tax money is used to fund Lifeline, which is financially supported by the Universal Service Fund. Telephone companies are required to pay into the fund, though most pass on the cost through a fee that appears on monthly bills. Life Wireless and other telephone companies receive up to \$10 per month from the Universal Service Fund for each eligible Lifeline customer. The exact amount varies by state. Federal rules prohibit customers from receiving service from more than one Lifeline carrier at the same time.

Life Wireless is an Eligible Telecommunications Carrier (ETC). Rollover is contingent upon the minutes program and that not all free minute plans contain rollover minutes. Forms of documentation necessary for enrollment: All subscribers will be required to demonstrate eligibility based at least on (1) Household Income at or below 135% of Fed Poverty guidelines for a household of that size; OR (2) the household's participation in one of the federal assistance programs. 1 - current or prior year's statement of benefits from a qualifying state, federal or Tribal program. 2 - a notice letter of participation in a qualifying state, federal or Tribal program. 3 - program participation documents (eg: consumers SNAP card, Medicaid card, or copy thereof). 4 - other official document evidencing the consumer's participation in a qualifying state, federal or Tribal program. Federal or Tribal notice letter of participation in General Assistance, Divorce decree, child support award, or other official document containing income information for at least three (3) months' time. Life Wireless will NOT retain a copy of this documentation. Section 600 - Functionality in Emergency Situations

Under FCC Rules, an ETC must demonstrate its ability to remain functional in emergency situations. Since Telrite Corporation d/b/a Life Wireless (Telrite) is providing service to its customers through the use of facilities obtained from other carriers, it is able to provide to its customers the same ability to remain functional in emergency situations as currently provided by the carriers to their own customers, including access to a reasonable amount of back-up power to ensure functionality without an external power source, re-routing traffic around damaged facilities, and the capability of managing traffic spikes resulting from emergency situations.

Telrite, along with their underlying carriers, have created back-up systems to ensure functionality in the event of a loss of power or network functionality. Telrite maintains its own diesel-powered backup generator at their switching facility in Georgia. All systems within the facility are implemented on redundant servers, each with redundant data network and power.
